CREATE

**ACTIVITIES!**

Print out the following activities on cardstock or any other durable paper you have at home. Then all you need is scissors, markers, and glue... it's paper engineering made easy!

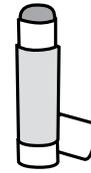

## TOOLS

Crayons, markers,  
or colored pencils

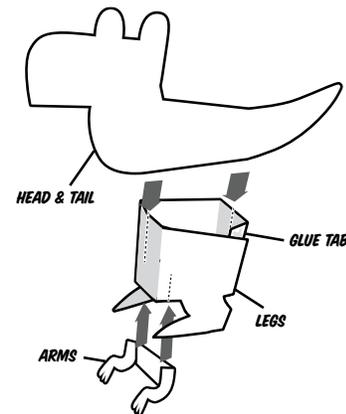

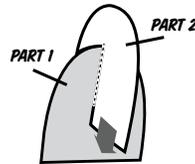

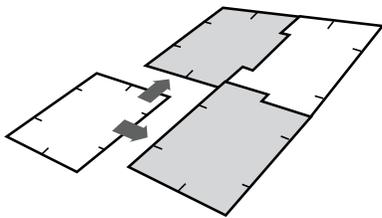

Scissors

Glue stick

## INSTRUCTIONS

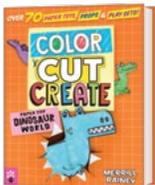

1. Pull out a page, color, and cut along the dotted lines.
2. Fold on the solid gray lines.
3. Place glue on each GLUE TAB and stick to the inside of the paper toy.
4. Using the diagrams below, assemble the paper toy by inserting the pieces into the slits you cut.

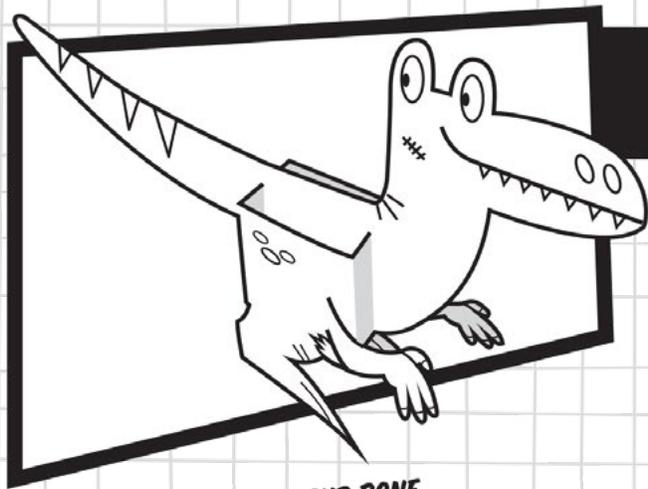

5. Be sure to follow any special instructions.
6. Use your imagination and **HAVE FUN!**

## CUTTING & GLUING TIPS

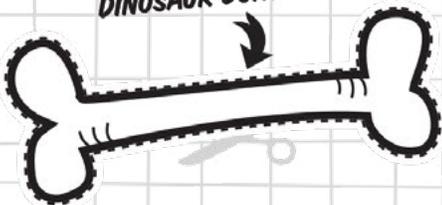

- When cutting, don't close your scissors all the way. This will prevent the paper from tearing at the tip of the scissors.
- To achieve smoother curves while cutting out your paper toy, turn the paper with the hand opposite your cutting hand.
- To cut more precisely, cut away all the extra paper around the paper toy pieces on each page first. Then cut along the dotted line.
- Use a glue stick rather than craft glue to be more precise.
- After you have applied your glue, be sure to hold your pieces together for at least ten seconds.
